

Biography

Gordon Harling received a Bachelor's degree in Applied Science from the University of Toronto and a *Maîtrise en Ingénierie Physique* from *Polytechnique Montréal*. He worked for ten years in Research and Development at large companies such as Mitel, NovAtel, and DALSA. Over the course of over twenty years he was founder and CEO of many start-up companies including Goal Semiconductor, Elliptic Technologies, and Innotime Technologies.

Mr. Harling worked in economic development for 5 years and, since 2018, has been CEO of CMC Microsystems, a not-for-profit which provides research infrastructure such as design tools and technology access for

- microelectronics,
- microelectromechanical systems (MEMS),
- photonics
- Artificial Intelligence/Machine Learning
- Internet of Things
- Quantum software and hardware

to colleges and universities across Canada.
